K1

The attached briefing charts for PAR 207, Contact Printer Study, are approved with the changes appearing in the comment thereon.

Sincerely,

25X

Declass Review by NGA.

8 April 1965

MEMORANDUM FOR: Chief, Exploratory Development
Laboratory Branch, P&DS

THROUGH: Assistant for Plans and Development, NPIC/P&DS

SUBJECT: Moire Pattern Test Targets

1. On 23 March 1965 four master half-tone glass plates and two film masters were turned over to [redacted] These test plates and their method of use is described in the attached enclosure (1). 25X

2. These test plates are used in connection with a study of contact printers for maximum fidelity by the [redacted] 25X
The latest report on the study is contained in enclosure (2), (dated 16 February 1965, report on P&R 207).

3. The subject test targets were obtained as a delivered product to permit our familiarization with their test procedure.

4. It is requested that these test plates and techniques involved be evaluated as soon as possible and a memorandum report be prepared for future reference. 25X
